## PRODUCT DESCRIPTION

**We have successfully developed supreme rust-resistant and anti-caking steel woks and frying pans.**

Oil soaks smoothly into our woks and frying pans letting you cook with greater ease.

Most steel woks and frying pans suffer from rusting and caking but our products overcome these problems as they have been optimised with a high heat treatment which keeps them free from rust and gives them lifetime protection.

YOSHIKAWA Innovation with confidence. A genuine “steel made product”.  
 Try out products and you will be using them for a lifetime.

100% made in Japan.  
 An innovative technology made from the highest quality steel for a superior performing product.

### No need for burning off coating

The steel surface is not anti-rust coated, different from clear lacquer-finished products. Therefore, the troublesome process of burning off coating is unnecessary and the product can be used as is.

### Features of special high-temperature thermal-treated steel plate

When an steel surface is strengthened with special high-temperature thermal treatment, an oxidized layer that is over five times harder than normal steel is formed. The layer covers the entire surface and also penetrates the steel. Therefore, no coating peels off when the surface comes into contact with a metal spatula or brush, different from inside resin-finished frying pans.

#### **Hard to burn ingredients and rust-resistant**

The oxidized layer on the steel surface has a number of small holes. Oil penetrates into the holes, preventing ingredients from becoming burned.

Since the product is hard to get rusty, maintenance is easy. Simply rinse off with hot water and then wipe with a dry cloth.

#### **Extra “steel content” for intake and high-flame cooking ability**

Steel discharged from the frying pan during cooking adds extra steel content to ingredients. The product can be used with a high flame because it is made of highly-durable steel. As a result, you can fry ingredients in a short time for a crisp texture.

#### **COOK-PAL REN Deep Frying Pan**

Material : Pan/Steel, Handle/Natural wood

##### **YH9909**

Size:24cm / Inner Dia.x Depth:248x65mm

Weight:Approx.865g / Thickness:1.6mm

##### **YH9910**

Size:26cm / Inner Dia.x Depth:270x70mm

Weight:Approx.965g / Thickness:1.6mm

##### **YH9911**

Size:28cm / Inner Dia.x Depth:292x75mm

Weight:Approx.1080g / Thickness:1.6mm
